

FOR IMMEDIATE RELEASE

August 28, 2021

M-Towers Announces Andriy Khomenko as the
Vice President of Innovation and Corporate Development

With the dawn of the 5G era, we are launching a series of substantial investments focused on new technology R&D, with the objective of raising efficiency of cellular tower deployments via end-to-end process innovation. The new management team will focus on BAU quality and performance at scale, as well as meaningful improvements in total cost of ownership for an MNO.

“The entire M-Towers team—from top management to R&D to PMs and tower crews—is looking forward to Andriy Khomenko joining the firm,” said Max Oley, President of M-Towers. “Andriy is the right leader to help M-Towers usher in a new era of tower deployment standards for our sector. Our team believes that Andriy’s extensive MNO experience coupled with M-Towers existing know-how and new R&D we have in progress will deliver just what the sector needs to meet and exceed increasingly rigorous efficiency requirements. With Andriy Khomenko joining the team, our top management is confident M-Towers will be well positioned to play an instrumental role in helping MNOs roll out next generation networks expanding both coverage and quality, based on substantive innovation in the end-to-end deployment processes.”

“I am looking forward to joining the M-Towers team and jointly face the challenge of 5G network deployment and footprint expansion,” said Andriy Khomenko. “M-Towers has an expert team with both proven experience in legacy processes and a culture of first-hand innovation that uniquely positions it to support the sector facing increasing density of urban deployments as well as the need to expand coverage in rural areas, often the toughest environments on the map.”

###

About M-Towers: M-Towers specializes in providing turn-key wireless equipment tower deployment and integration services for Wireless Telecommunications and Commercial Construction industries, maintaining a footprint throughout the Southeastern, Central and Midwest regions of the United States. Our team includes fully certified and insured crew members with long-term industry experience, earning top-quality feedback from customers such as AT&T, T-Mobile, Sprint, US Cellular, Verizon, Samsung, Nokia, Ericsson, XM Radio, research and development engineers, as well as experts in project management and site acquisition. <http://www.m-towers.com>
